About me

It's almost 2 years that I've started development and it's been more than a year that I'm working with React JS. As React updates frequently I try my best to stay updated, learn new skills about it, and enjoy the process.

سوابق تحصیلی

کارشناسی Computer engineering

موسسه/دانشگاه: Islamshahr Azad University آزاد
تهران
ورودی سال ۱۴۰۰

پروژه‌ها

Yasin Yunesi portfolio

اسفند ۱۴۰۰

This portfolio is my online resume which includes my skills, education, and contact information. It's built using React JS, Bootstrap 5, and Sass. I've used firebase to handle users' requests.

Movie ave

اسفند ۱۴۰۰

Movie ave is a web app that includes complete information (Posters, Cast, ratings, some info about the story, etc.) about any movie you could think of which you can access after you've signed up. To build this web app I've used React JS, Bootstrap, and Sass. And Firebase has been used to handle authentication. The movies are being fetched from TMDB API which is a powerful and complete one.

Amazon Clone

فروردین ۱۴۰۰

This website is a clone of the Amazon website. However, it has some slight changes. As you expected I've used React JS to build the app and used Auth0 to handle authentications. To style the website I've used Tailwind CSS and used Redux toolkit for state management.
